100% WATERPROOF

DURABLE, RESISTANT AND EASY TO MAINTAIN

The elasticity and resilience of Hydrocork's cork layer create a floor that is adaptable to pressure, adding the capacity to absorb, resist and recover from violent impacts. The surface is made with a protective wear layer making easy to clean.

MORE THAN JUST A BEAUTIFUL FLOOR

Hydrocork is a low thickness floating solution with a core board made of composite cork that can be placed in any indoor space without boundaries. Ideal for renovations. Hydrocork is also 100% waterproof, incredibly stable, durable, great noise absorber, and thermal insulator - all due to the unmatched cork properties.

SILENCE

Hydrocork can act as a noisy buffer between the floor and the rooms underneath reducing the walking sound up to 53 %.

NATURAL THERMAL INSULATION

The natural thermal insulation properties of cork make Hydrocork very energy efficient and provide an optimal floor temperature throughout the year which contributes to an overall comfort.

WALKING COMFORT

Hydrocork inherent flexibility provides a unique comfort in movement. Even when walking barefoot, a sense of cosiness, relaxation and enjoyment is felt.

BODY WELLNESS

Hydrocork is the perfect balance between overly hard or too soft floors providing the needed stability to reduce effort on walking and decrease body fatigue.

IMPACT RESISTANT

Hydrocork it's a high shocking absorber maintaining it's resistance at the same time. It's a very robust flooring with a long life span.
