

CONLIT STEELPROTECT BOARD (ALU)

CONLIT STEELPROTECT BOARD is an incombustible stone wool panel with very high density.

This fire prevention protective panel has been designed for fire-stop insulation of metal structures.

This panel is available in both unclad version and a version clad on one face with glass fibre reinforced aluminium foil.

ADVANTAGES

- Easy to use, simple to cut and adjust measurements
- Light and easy to handle
- Tested in accordance with European standard EN 13501-2
- Can be applied both bonded and screwed
- Special Conlit screws available for fast, dry application

PRODUCT PROPERTIES

	Services	Standards
Fire behaviour	A1	EN 13501-1
Fire resistance	*CE marking, ETA 09/0275	EN 13501-2
Water absorption	Water absorption < 1 kg/m ²	EN 1609
Compression strength	55 kPa for 10% deformation	EN 826

FIRE PREVENTION PROTECTIVE PANEL

Thickness (mm)	Length (mm)	Width (mm)	Packaging (m ² /pkg)
20	1800	1200	129.60
25	1800	1200	97.20
30	1800	1200	86.40
35	1800	1200	77.76
